Understanding your Support

Review support maintenance programs and offerings.

Registering for Support

Access the <u>erwin support</u> site and click Sign in to register for product support.

Accessing Technical Support

For your convenience, erwin provides easy access to "One Stop" support for <u>erwin Data</u> Intelligence Suite (DI Suite), and includes the following:

- Online and telephone contact information for technical assistance and customer services
- Information about user communities and forums
- Product and documentation downloads
- erwin Support policies and guidelines
- Other helpful resources appropriate for your product

For information about other erwin products, visit <u>http://erwin.com/</u>.

Provide Feedback

If you have comments or questions, or feedback about erwin product documentation, you can send a message to <u>distechpubs@erwin.com</u>.

erwin Data Modeler News and Events

Visit <u>www.erwin.com</u> to get up-to-date news, announcements, and events. View video demos and read up on customer success stories and articles by industry experts.

Managing Reports

You can view, create, manage reports, and dashboard configurations from the Reporting Manager. You can also evaluate the team's productivity and create statistical reports. It involves creating and publishing reports and dashboards. From the Reporting Manager, you can generate custom reports of your data integration project using SQL queries.

Using Reporting Manager

To access the Reporting Manager, go to **Application Menu > Miscellaneous > Reporting Manager**.

The Reporting Manager dashboard appears:

UI Section	Function
1-Reporting	Use this pane to browse through categories, reports, and dashboards. It
Workspace	enables you to create and categorize reports and dashboards.
2 Dight Dana	Based on the selection in the Reporting Workspace, use this pane to view and
2-Right Pane	edit reports, dashboard details and category details.

From the Reporting Manager you can:

- Create custom reports
- Create dashboard

Creating Categories

You can create custom reports and group them under different categories. Also, you can <u>create multiple reports</u> under a category.

To create categories, follow these steps:

- 1. Go to Application Menu > Miscellaneous > Reporting Manager.
- 2. In the **Reporting Workspace** pane, right-click the **Categories** node.

DATA INTELLIGENCE SUITE Reporting	g Ma	nager	
Reporting Workspace <	< .	Categories	Settings
Categories			

3. Click New Category.

The New Category page appears.

🗖 New Category								_ 🗆 🗙
							Ľ	×
Category Name*								
Description	<u>a</u>	<u>H</u> B	ΙÜ	≣ ≣	■ ■	j≘ i ≘ t≊	'≣ �	
								*

4. Enter Category Name and Description.

For example:

- Category Name: Workflow_Status
- **Description:** The category contains workflow related reports.
- 5. Click

The category is created and saved in the Categories tree.

Creating Custom Reports

You can create custom reports and classify them under different categories. The reports are generated based on the SQL queries and can be exported to an excel sheet. You can generate reports key metrics from your data integration project and view these reports in a chart and in a grid view.

You can also import reports, and export reports in a .arp format.

To create a new report, you must <u>create a new category</u>. You can create reports under a new or an existing category.

To create a report, follow these steps:

- 1. In the **Reporting Workspace** pane, expand a category node.
- 2. Right-click the **Reports** node.

DATA INTELLIGENCE SUITE Reporting Morkspace	Manager	Categories	Settings
 Categories Workflow_Status Reports A Dashbo New Report 	#	Category Name	Category H
Import Report	1	Workflow_Status	

3. Click New Report.

The following page appears.

Switch to Chart Mode

Click this option to view the reports as a chart.

Export to Excel

Click this option to to download the report in .xlsx format.

Export to PDF

Click this option to to download the report in .pdf format.

Edit

Click this option to update the report, and choose a chart type from Settings tab.

You can also import and export reports from a category. For more information, on exporting and importing reports, refer to the Exporting and Importing Reports topic.

You can also manage the custom reports. Managing reports involves:

- Editing reports
- Copying reports

- Exporting reports
- Deleting reports

Managing Custom Reports

Managing custom reports involves:

- Editing reports
- Copying reports
- Exporting reports
- Deleting reports

To manage reports, follow these steps:

- 1. In the **Reporting Workspace** pane, expand a category.
- 2. Expand the **Reports** node, select and right-click a report.

	DATA INTELLIGENCE SUITE	eporting	Manager			
Rep	oorting Workspace	<	Edit

	Tech Pubs Report 2	Cop	by Report ort Report	A small description c	of this report.	
	Tech Pubs Cat 2	Dele 🔟	ete Report(s)			

3. Use the following options:

Copy Report

Use this option to copy a report and past it in another category.

Export Report

Use this option export the report into XLSX file.

Delete Report(s)

Use this option to delete a report under a category.

Edit Report

Use this option to update report details. To edit a report, select a report from a category and click **Edit**.

Exporting and Importing Reports

From the Reporting Manager you can:

- Export reports
- Import reports

You can also import reports from a different category.

Export Reports

To export reports, follow these steps:

1. In the **Reporting Workspace** pane, expand the **Reports** node, and right-click a report.

DATA INTELLIGENCE SUITE	eporting Manager			
Reporting Workspace	< Edit			
 Categories New_Category 	↓ Overview	Design	Extended Properties	History

2. Click Import Report.

The Import Report page appears.

Import Report	_ 🗆 ×
Drag-n-Drop files here or click to select files for uplo	ad.
1	

- 3. Drag and drop the report (.ARP format) or use 😑 to browse the report.
- 4. Click 1

The report is imported to the category.

Creating Dashboard

A dashboard is a collection of charts and reports. Dashboards are grouped under categories.

To create a dashboard, follow these steps:

1. In the **Reporting Workspace** pane, expand a category, and right-click the **Dashboards** node.

DATA INTELLIGENCE SUITE Rep	porting Manag	er	
Reporting Workspace	_ ۲ ک	Categories	Settings
 Categories Workflow_Status Reports 	#	Category Name	Category Hier
Mew Do Mew Do Mey Do	ashBoard DashBoard	Workflow_Status	

2. Click New Dashboard.

The New Dashboard page appears.

New Dashboard								_ 🗆 ×
								×
							_	
Dashboard Name* :								
Descriptions								
Description:		н.	В	Ι	[E	= =		
								^
								_
	L							

3. Enter Dashboard Name and Description.

For example:

- **Dashboard Name**: Work-flows
- **Description**: The dashboard is a collection of reports related to work flows.
- 4. Click

A new dashboard is created and saved in the dashboard tree.

Once a dashboard is created, you can <u>add components to the dashboard</u> and <u>manage dashboards</u>.

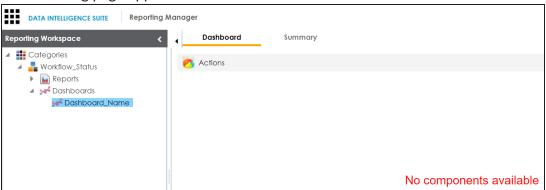

Adding Dashboard Components

You can add reports to the category's dashboard and it helps you accessing all the reports in one place.

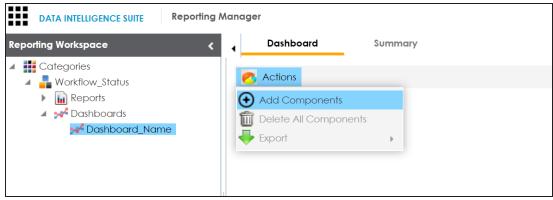

To add components to a dashboard, follow these steps:

- 1. In the **Reporting Workspace** pane, expand a category.
- 2. Expand the Dashboards node and click a dashboard name to add a component to it.

The following page appears.

3. Click Actions.

4. Click Add Components.

The Add Components page appears.

Add Components		_ 🗆 ×
	Save	Cancel
Component Name		

The Category List page appears.

Category	List	_ 🗆 ×
⊿ ∰ Categi ∰ Wo	ories rkflow_Status	Cancel

6. Select a category and click **Select**.

The reports in the category are added to the dashboard.

Managing Dashboards

Managing dashboard involves:

- Editing dashboard
- Copying dashboard

- Exporting dashboard
- Deleting dashboard(s)

To manage dashboards, follow these steps:

1. In the **Reporting Workspace** pane, right-click a dashboard.

DATA INTELLIGENCE SUITE Reporting	Manager

۲ech_Pub_Dashboarc الله و ۲ ۲	Copy Dash dit DashBo xport Dash Delete Das	bard nBoard				

2. Use the following options:

Copy Dashboard

Use this option to copy a dashboard and past it in another category.

Edit Dashboard

Use this option to update an existing dashboard.

Export Dashboard

Use this option export the dashboard into XLSX file.

Delete Report(s)

Use this option to delete a dashboard under a category.

Configuring Extended Properties

You can configure user-defined properties of a report by designing a form, and you can access that form under the **Extended Properties** tab. First, you need to set up a form and then use it to configure its properties.

To configure extended properties of reports, follow these steps:

- 1. In the **Reporting Workspace** pane, click a report.
- 2. In the right pane, click the **Extended Properties** tab.

Reporting Workspace	<	Edit			
 Categories Lategory 	•	Overview	Design	Extended Properties	History

The Extended Properties Configuration page contains the following sections:

- **Field Controls**: Displays the available UI elements.
- **Configure Form**: This pane enables you to design forms using the UI elements in the **Field Controls** pane.
- Properties: Displays the properties of the selected UI element in the Configure
 Form pane.
- 5. Click Edit.
- 6. Double-click the UI elements from the **Field Controls** pane or drag and drop it into the **Configure Form** pane.

7. Select a UI element in the **Configure Form** pane, one at a time, to configure their properties in the **Properties** pane.

Extended Properties Configuration				_ 🗆 ×

ded Properties	Switch Visible in Extended Properties to ON to make it visible.
Order	Displays the order of the field in a form. You can drag and drop the
	field in the Configure Form pane to change its order.

8. Click Save.

The form is saved under the Extended Properties tab.

To use the form, follow these steps:

- 1. In the **Reporting Workspace** pane, click a report and click the **Extended Properties** tab.
- 2. Click **Edit** and use the form.

You can download the extended properties in the XLSX format and use it as a template to <u>import extended properties</u>. To download extended properties, on the **Extended Properties** tab, click **Export To Excel**.

3. Click Save.

The form is updated.

Importing from Excel

You can import user-defined properties for reports from an XLSX file. You can either use an existing XLSX file or download an extended properties file from the Extended Properties tab. Ensure that the XLSX file follows the correct template.

To import extended properties from XLSX files, follow these steps:

1. On the Extended Properties tab, click Import From Excel.

The Upload Excel page appears.

- 2. Click Choose File.
- 3. Browse and select the XLSX file.

4. Click

The Upload Excel page appears. It displays the data in the XLSX file.

Upload Excel						-
1 ×
