## Contact erwin

### Understanding your Support

Review [support maintenance programs and offerings](#).

### Registering for Support

Access the [erwin support](#) site and click Sign in to register for product support.

### Accessing Technical Support

For your convenience, erwin provides easy access to "One Stop" support for [erwin Data Intelligence \(erwin DI\)](#), and includes the following:

- Online and telephone contact information for technical assistance and customer services
- Information about user communities and forums
- Product and documentation downloads
- erwin Support policies and guidelines
- Other helpful resources appropriate for your product

For information about other erwin products, visit <http://erwin.com/>.

### Provide Feedback

If you have comments or questions, or feedback about erwin product documentation, you can send a message to [distechpubs@erwin.com](mailto:distechpubs@erwin.com).

### erwin Data Modeler News and Events

Visit [www.erwin.com](http://www.erwin.com) to get up-to-date news, announcements, and events. View video demos and read up on customer success stories and articles by industry experts.

# What's New

The latest erwin Data Intelligence (erwin DI) version,v12.0, has the following new features:

[Discover Assets](#)

[My Action Center](#)

[Data Quality Analysis using DQLabs](#)

[Enhanced Data Lineage and Impact Analyzer](#)

[Snowflake Key-Pair Authentication](#)

[Productivity Enhancements](#)

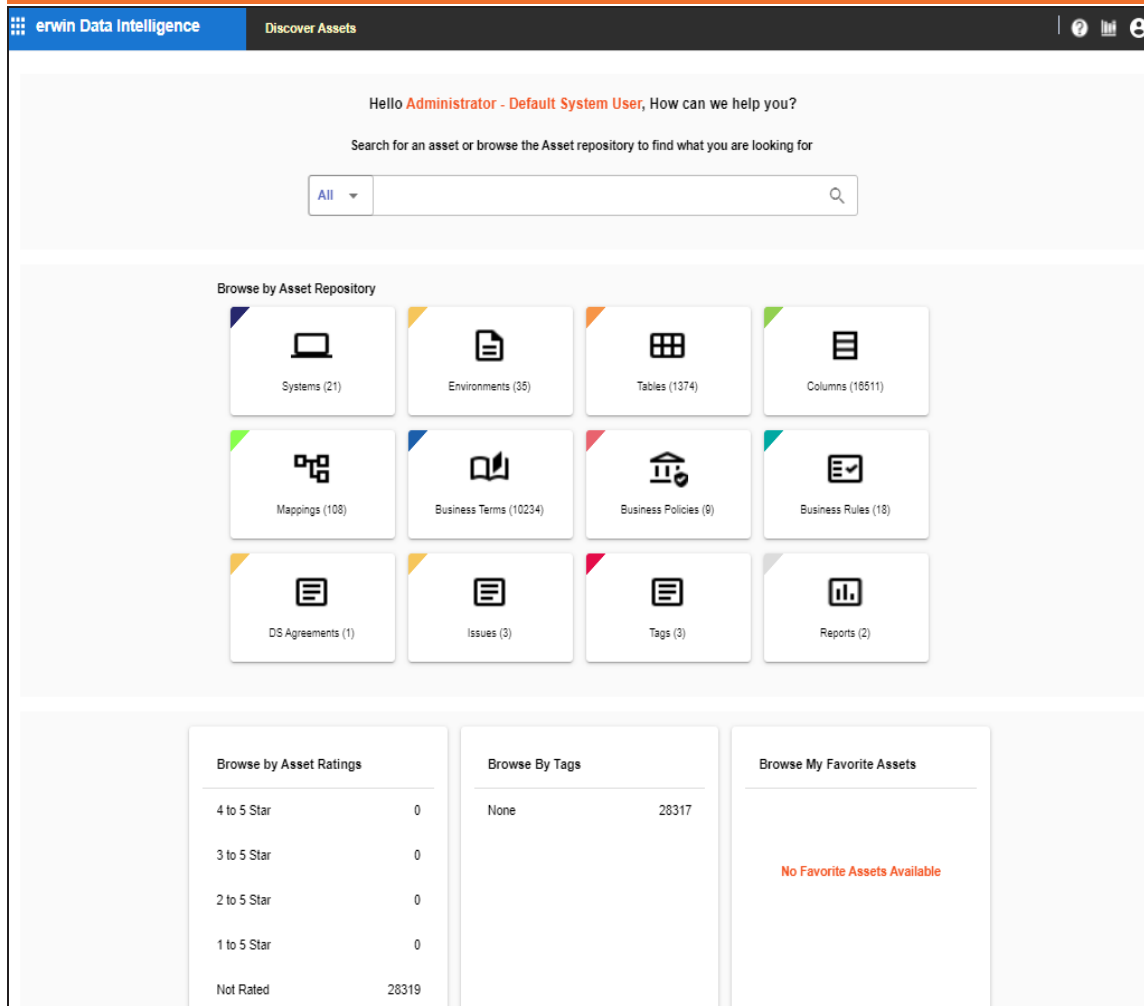

The following sections explain each feature in brief. For detailed information about features, refer to the [Detailed Features List](#).

## Discover Assets

erwin DI now introduces an asset discovery module, [Discover Assets](#), replacing the erwin DI Business User Portal (erwin BUP).

It provides business users and data governance teams with an easy way to discover data and collaborate on data assets. With flexible search and filter mechanisms, mind maps, lineage, impact, and data ratings, you can analyze data assets, improve data accessibility, promote collaboration, and make data governance decisions.

## What's New

## My Action Center

erwin DI now introduces a module, [My Action Center](#) to manage tasks created and assigned to team members for collaboration. You can track tasks, chat with assigned users, and configure task types. Apart from a separate module, My Action Center is accessible for mappings and business assets via Mapping Manager and Business Glossary Manager respectively.

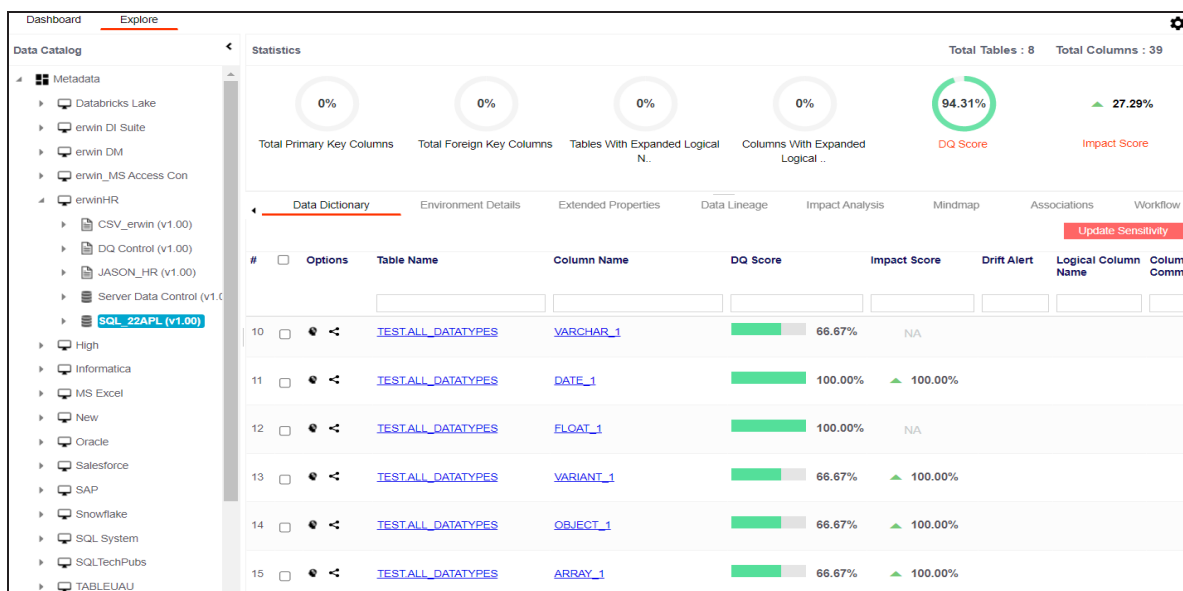

### Data Quality Analysis using DQLabs

erwin DI now offers data quality capabilities and integrates DQLabs as data quality analysis partner. This helps organizations reduce operational risks and costs and empower team operations to support better data governance.

AI powered DQLabs lets you [profile data](#) across your environments and datasets associated with your metadata to provide in-depth data quality analysis. Leverage the data quality analysis to understand the deviation in data, monitoring drift, behavior analysis, and more.

Data quality analysis is displayed alongside erwin DI's data catalog, asset searches, lineage, and impact analysis.

This [integration](#) enables you to derive data quality parameters, such as DQ Score, Impact Score, and Drift Alert in erwin DI's Metadata Manager. Data quality analysis for environments, tables, and columns.

### Enhanced Data Lineage and Impact Analyzer

You can now dive into asset-based, comprehensive, cleaner, and performance-efficient data analysis using the enhanced data lineage and impact analyzer.

## What's New

---

Data lineage and impact analysis now uses new age graph database technology and extends enterprise asset and sensitive data classification tagging for greater visibility and automated governance. This further boosts performance and usability, and in turn, lets you run lineage on a specific asset on core modules.

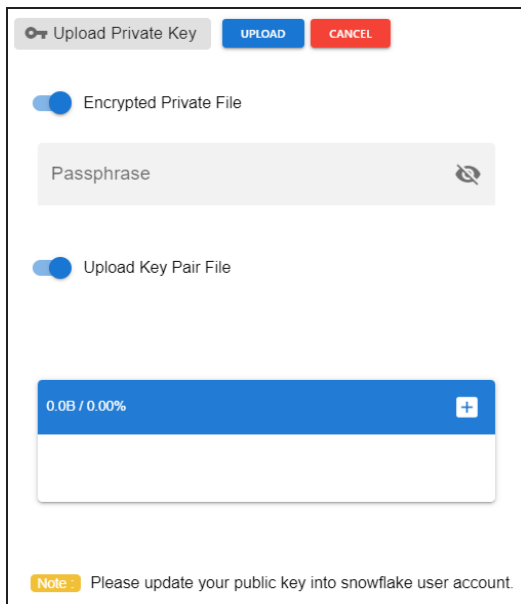

Data lineage visualizations integrate data quality scores, sensitive data classifications, simplified asset overviews, and more, all in a single view.

Tables are now grouped within systems and environments in the lineage diagrams to enhance readability and data governance. Also, improvements to UI brings new graphical and grid view across the application.

You can run lineage analyzer for an asset at any level from [discover assets](#), [metadata](#), and [mapping](#) manager modules. Also, you can perform impact analysis for an asset at any level from [discover assets](#), [metadata](#), and [mapping](#) manager modules.

## Snowflake Key-Pair Authentication

erwin DI now offers the [key pair authentication](#) support for Snowflake. Instead of using password to connect to the Snowflake database, you can use more secured key pair authentication.

Key Upload Private Key **UPLOAD** **CANCEL**

☒ Encrypted Private File

Passphrase 

☒ Upload Key Pair File

0.0B / 0.00% 

**Note** : Please update your public key into snowflake user account.

## Productivity Enhancements

### Enhanced Auto Map Capabilities

You can now use the [auto map](#) feature even when the source and target columns do not match. With enriched auto map capabilities, you can view recommended matches for a source column and select the most appropriate target column.

**Auto Map Source & Target Objects**

Mapping Groups: [Add Group](#) [Delete Group](#) Ranking Threshold:   $\geq 50\%$  Number of Recommendations:   $\leq 50$

View All  
EmployeeTerritories\_Em

**Source Object(s)**

dbo.EmployeeTerritories  
dbo.Employees

**Target Object(s)**

dbo.EmployeeTerritories  
dbo.Employees

**Auto Mapping Preview Grid**

#	Source System	Source Environment	Source Object	Source Attribute	Target Attribute	Target Object	Target Environment	Target System	Total Recommendations
5	QuestHR	QuestPayroll	dbo.Employees	City	City	dbo.Employees	AdvancePayroll	QuestPayroll	2
6	QuestHR	QuestPayroll	dbo.Employees	Country	Country	dbo.Employees	AdvancePayroll	QuestPayroll	2
7	QuestHR	QuestPayroll	dbo.Employees	EmployeeID	EmployeeIDNu	dbo.Employees	AdvancePayroll	QuestPayroll	3

Total Rows: 21 | Target Tables: 2 | Source Tables: 2 | Targets Not Mapped: 1 | Sources Not Mapped: 1

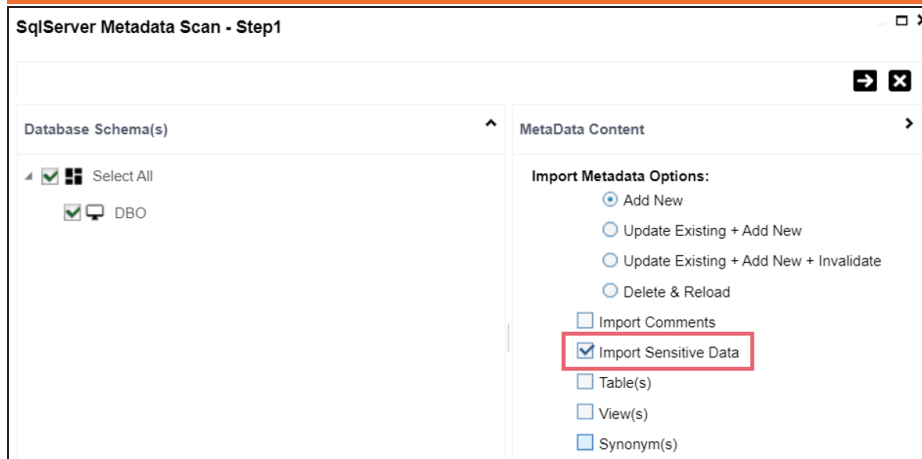

☐ Create a distinct Mapping for every Group

### Fetching SDI Classification from Data Sources

Import Sensitivity Data Indicator (SDI) classification when you harvest metadata from your data sources. You can import SDI classification for SQL, Oracle, and Snowflake data sources.

Select the **Import Sensitivity Data** during a metadata scan to fetch SDI classifications for the assets.

## What's New

## Business Entity Types

You can now configure background color, text color, and icon of any environment and table using the [Business Entity Types](#) setting.

Business Entity Types										
#	Entity Name	Object Type	Background Color	Text Color	Icon	Created By	Created Date Time	Last Modified By	Last Modified Date Time	Actions
1	System	SYSTEM				System	2022-04-19 12:47:01.38	System	2022-04-19 12:47:01.38	 
2	Amazon Redshift	ENVIRONMENT				System	2022-04-19 12:47:01.35	System	2022-04-19 12:47:01.35	 
3	Big Data - Cloudera	ENVIRONMENT				System	2022-04-19 12:47:01.357	System	2022-04-19 12:47:01.357	 
4	Big Data - Hortonwor...	ENVIRONMENT				System	2022-04-19 12:47:01.36	System	2022-04-19 12:47:01.36	 

## UI for Scheduled Jobs Maintenance

You can now [manage all scheduled jobs](#) (metadata, smart connectors, and so on) via a single screen with the ability to abort long running tasks.

## Multi Sensitive Data Classification

erwin Data Intelligence has enhanced capability to tag an IT or Business Asset with multiple levels of sensitivity. You can now tag assets with more than one data classification at a time.

### Enterprise Tags

You can now [create and tag IT assets](#) in the Data Catalog including Systems, Environments, Tables, Columns and Mappings to speed future discovery, organize for analysis and lay the foundation for future automation.

### Compliance Reports Starter Kit

You can now generate compliance reports for your assets, [import](#), [run reports](#), [set threshold](#), and [send alerts periodically](#) with predefined report sets that come with the Compliance Reports Starter Kit. [View and download the compliance reports](#) in the Discover Assets module.
