Understanding your Support

Review support maintenance programs and offerings.

Registering for Support

Access the <u>erwin support</u> site and click Sign in to register for product support.

Accessing Technical Support

For your convenience, erwin provides easy access to "One Stop" support for <u>erwin Data Intelligence</u> (erwin DI), and includes the following:

- Online and telephone contact information for technical assistance and customer services
- Information about user communities and forums
- Product and documentation downloads
- erwin Support policies and guidelines
- Other helpful resources appropriate for your product

For information about other erwin products, visit <u>http://erwin.com/</u>.

Provide Feedback

If you have comments or questions, or feedback about erwin product documentation, you can send a message to <u>distechpubs@erwin.com</u>.

erwin Data Modeler News and Events

Visit <u>www.erwin.com</u> to get up-to-date news, announcements, and events. View video demos and read up on customer success stories and articles by industry experts.

Introduction

This document is intended to serve as manual for the integration of SSO using a SAML application in DQLabs. In this document we have provided the steps to integrate with the Octa active directory.

Overview

- Single Sign-on feature in DQLabs is used to login to the portal without manually creating the users.
- DQLabs will support Single sign-on only when the DNS name has the secured protocol.
- DQLabs claim information is Email, so the user cannot be able to login using the username.
- When DQLabs is already installed with the private IP or http. Please redeploy with the domain name.
 - For windows: Redeploy the DQLabs_Windows_Client_Code_Upgrade script.
 - For Linux: Linux code update script DQLabs_Linux_Upgrade script.

Note: If the environment is Windows, please make sure that the Reverse rewrite host option is disabled in the application settings under IIS. Steps to disable the reverse rewrite option is given below.

Steps to Configure SSO in DQLabs

The following steps are covered in the configuration of SSO in DQLabs

- ARR Settings for windows (Applicable only for windows environment)
- Creation of SAML configuration URL with example
- Logging in using SSO

ARR Settings for Window

- On the Start screen, click the Control Panel.
- Click System and Security, and then click Administrative Tools.
- In the Administrative Tools window, double-click Internet Information Services (IIS) Manager

• Now click on server proxy settings under Proxy

| Internet Information Services (IIS) N | Manager | | | | | | - | ٥ | ; |
|---|--|-------------------|---------------|--------------------------------|--|---|--|--------------------------|---|
| ← → €C2AMAZ-7Q4V | /825 > | | | | | | 9 | 🛛 🟠 | |
| File View Help | | | | | | | | | |
| Connections Solution Connections Start Page Start Page C2AMAZ-7Q4V825 (EC2AMA | 11 N N N N N N N N N N N N N N N N N N | n Request Routing | | e Actions to configure disk ca | sche settings and manage cached content. | Cach | e Managen e Configura | ation | |
| Application Pools Sites Sites Server Farms | Drive Location | Priority | Health Status | Maximum Size (GB) | Utilization (%) | Reset Drive Add 1 Add 2 Proxy | e Control R Cache Stat Managem Drive Gecondary I r Proxy Sett | tistics nent Drive | |

• Under Server Proxy Settings, make sure that the Reverse rewrite host in response headers check box is disabled. If not, disable the check box and click Apply.

| Jse this feature to configure proxy settings for Application Request Routing. | |

| | Reverse rewrite host in response headers | Advanced Routing |
| | Custom Headers | URL Rewrite |
| | Preserve client IP in the following header: | e nep |
| | X-Forwarded-For | |
| | Include TCP port from client IP | |

Create SAML Configuration URL

- Login as a superuser.
- Click User > Settings > Configurations tab > Properties.

| Û | | | | | | |
|---|----------|----------|-------------|----------------|----------------|----|
| ? | Settings | k_PUL | * 0 | 66.1% | ~ 39.1% | |
| | Logout 🖒 | asets: 1 | Total Colur | mns: 15 | Total Rows: | 20 |

• Provide the Server's DNS Name in the DNS Name input field.

| Settings | U | - | | | | | |
|------------------|-------------------------|--------|---------------------|------------------|-------|-----------------|-----------------|
| Profile | Organization | System | Configurations | Libraries | Theme | Logging | |
| | | | | | | | |
| | | | | | | | |
| Modules | | | | | | | ` |
| | | | | | | | |
| Properties | | | | | | | |
| Preview Count | Dataset Percentage | | Max Concurrent Jobs | Drift Days Count | | | |
| 20 | 100 | | 5 | 5 | | Skip Drift Date | Push Permission |
| | | | | | | | |
| | | | | | | | |
| | | _ | | | | | |
| Host Address | DNS Name | | | | | | |
| Tiose / tale ess | Britoritanic | | | | | | |

• Once the DNS name got updated the following **Basic SAML Configurations** details will get generated under each organization level settings.

- User can open the organization level Settings by clicking Organization > Edit > System > SSO to get the following details.
 - o Entity ID
 - SIGN IN URL
 - ACS URL

| Settings | | | | | | | |
|----------------------------|------------------|----------------------|----------------|-----------|--------------|---------------|---|
| General | Users | System | Configurations | Libraries | F | toles | Theme |
| 550 | | | | | | | |
| | | | | | | | |
| Basic SAML Configurations | | | | | | | |
| Entity ID | | | | | SIGN IN URL | | |
| •••••• | •••••••••••••••• | | | | | •••••• | ••••••••••••••••••••••••••••••••••••••• |
| ACS URL | | | | | | | |
| ••••• | | | | | | | |
| User Attributes and Claims | | | | | | | |
| emailaddress | | User.emai | i. | | | | |
| Response | | Signed | | | | | |
| Assertion Signature | | Signed | | | | | |
| Signature Algorithm | | RSA_SHA | 256 | | | | |
| Digest Algorithm | | SHA256 | | | | | |
| Assert Encryption | | Unencrypt | ted | | | | |
| Organization Input Here | | | | | | | |
| Private Key | | | | | | | |
| | | FaENnWWVGV0wxTGdOekJ | | | Update Feder | ation File(s) | |

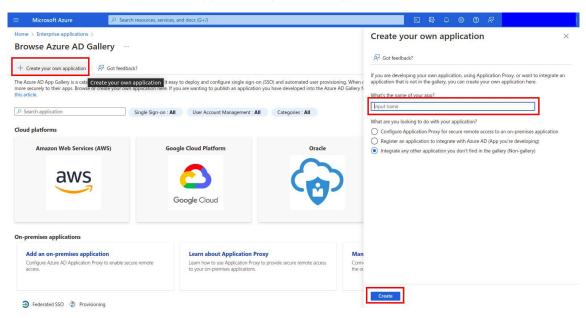

- Using this Basic SAML Configurations, download the federation file in the Active Directory. Please see the following example using Microsoft Azure.
- Add the domain name under the domains field. Same domain should be used while login to the DQLabs application.

SAML Configuration Using Microsoft Azure:

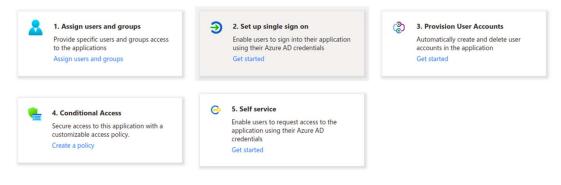

- Open the Microsoft azure application and search for Enterprise applications.
- Click on New application.

| | Microsoft Azure | 오 Search resources, services, and docs (G+/) 🛛 😨 💀 🗘 🔞 🕐 🖈 | |
|-------|---------------------------|---|----------|
| | > Enterprise applications | | |
| | Enterprise applicatio | ons All applications | \times |
| Overv | ew 🍧 | 🕂 New application 🕐 Refresh 🞍 Download (Export) 🚯 Preview info 🎫 Columns 🐻 Preview features 🖗 Got feedback? | |
| 0 0 | verview | View, filter, and search provider. | Î |

• Click on Create your own application > provide an app name and click Create.

• Once the app created, click on Set up single sign on.

• Click on SAML.

| Select a single sign-on method | lp me decide | |
|---|--|---|
| Disabled Single sign-on is not enabled. The user won't be able to launch the app from My Apps. | SAML Rich and secure authentication to applications using the SAML (Security Assertion Markup Language) protocol. | Password-based Password storage and replay using a web browser extension or mobile app. |
| Linked Link to an application in My Apps and/or Office 365 application launcher. | | |

• On the SAML page, click Edit in Basic SAML Configuration.

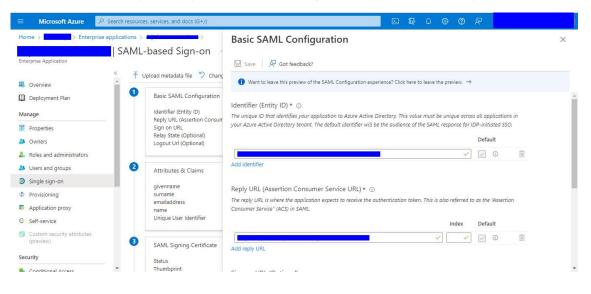

Set up Single Sign-On with SAML

An SSO implementation based on federation protocols improves security, reliability, and end user experiences and is easier to implement. Choose SAML single sign-on whenever possible for existing applications that do not use OpenID Connect or OAuth. Learn more.

Read the configuration guide ♂ for help integrating test1.

Paste the Entity ID, Reply URL(ACS URL) and Sign on URL from the DQLabs portal

• Now user can able to download the Federation Metadata XML in the third step.

| ≡ Microsoft Azure | 우 Search resources, services, and docs (G+/) | |
|--|--|-----|
| Home > Enterpr | | |
| Enterprise Application | SAML-based Sign-on | × |
| Uverview | Vpload metadata file Change single sign-on mode Test this application Got feedback? SAML Signing Certificate | |
| Deployment Plan Manage | Status Active Thumbprint EBD01A901168740824DF5A9DAC5416E34F092122 Expiration 1/29/2024, 1:06:55 PM | |
| Properties Owners Roles and administrators | Notification Email App Federation Metadata Uri Certificate (Base64) Download | |
| Users and groups | Certificate (Raw) Download Federation Metadata XML Download | - 1 |

| Application proxy | You'll need to configure the application to link with Azure AD. Login URL | |
| Custom security attributes (preview) | Azure AD Identifier Logout URL | |
| Security | View step-by-step instructions | |

• Insert the private key in the private key input field under the Organization Input Here section in Organisation Settings > System > SSO.

Private Key- Private key is the same key which used to generate csr to get ssl crt , same private key need to use in our portal

| Organization Input Here | |
|--|---------------------------|
| Private Key | |
| XXXXZ0FBQUFBQml3dU5SbFQyUHILdzE2dzBMMy1FaENnWWVGV0wxTGdOekJTaGp4b1NpeUJqc2Jh | Update Federation File(s) |
| www.corp.doi.pd/iii.pd/opan/d/opan/d/opan/ariana/arian/ari | |
| | |

• Once the private key is pasted, upload the downloaded federation file in Update Federation File option will get enabled next to the input field.

Login Using SSO

- Open the portal in the browser and enter the username in the login page.
 - Username must contain valid user name followed by the constant domain name. (Domain name is case sensitive).

For example: user@domain.com

- Click the SignIn SSO option.
- Now the user will get navigated to the corresponding SSO login page.

| Microsoft Azure |
|---|
| Microsoft Sign in To continue to Microsoft Azare Email address, phone number or Skype No account? Create onet: Can't access your account? Back Next |
| Sign in with GitHub |

• Once the user logged in to the portal successfully, user can verify the user profile and organisation details in Settings > Profile.

| Note: By default, the user's role will be User and this role can be alter | ed. |
|---|-----|
