## What's New

erwin Data Intelligence (erwin DI) version 15.1, has the following new features and enhancements:

- [erwinAI Bot](#)
- [Data Profiling Configuration Enhancement](#)
- [Language Preference and Password Change Support](#)

### erwinAI Bot

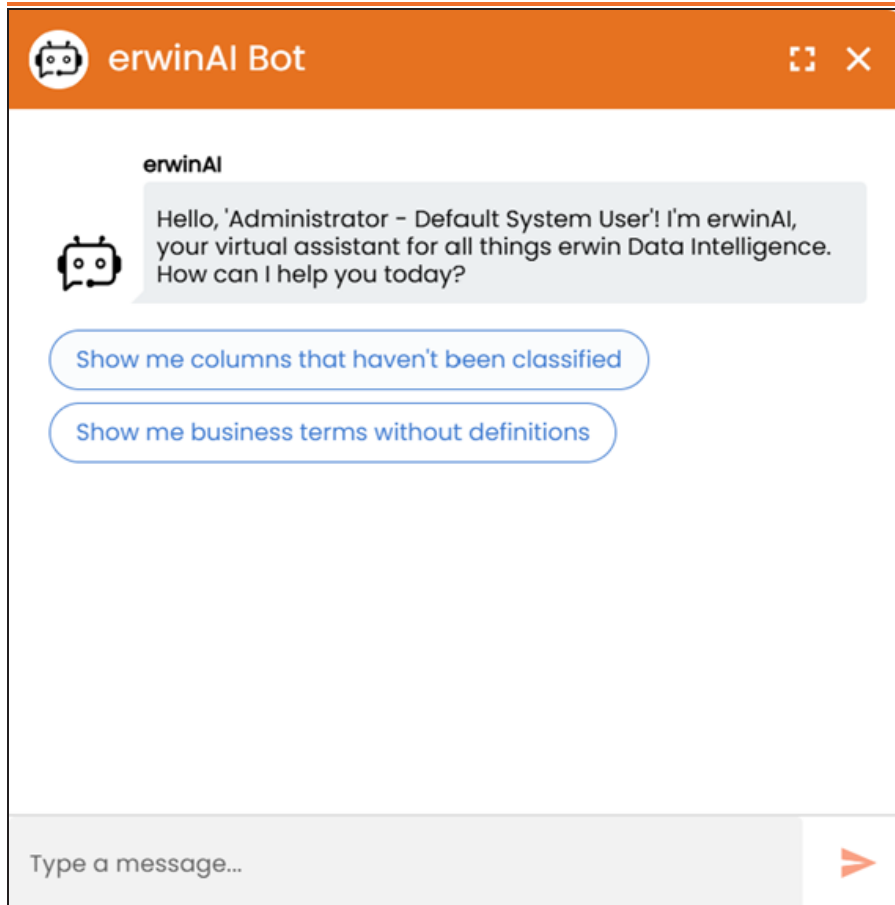

erwinAI is a generative AI bot that instantly and automatically generates definitions for undefined business terms and classifications for unclassified columns. After results are generated, you can evaluate them and choose to submit or regenerate—maintaining a human-in-the-loop workflow.

For improving productivity, it enables you to:

- Use suggested prompts or enter custom ones.
- Evaluate and regenerate results before final submission.

This capability is available in the following key modules:

- Discover Assets
- Metadata Manager
- Business Glossary Manager

For more information, refer to the [erwinAI Bot](#) and [Configuring erwinAI Bot](#) topics.

## Data Profiling Configuration Enhancement

A new field, DQ Version, has been added under the Data Profiling Configuration tab. This field displays the version of erwin Data Quality integrated with your DI instance. It enables you to verify compatibility and manage profiling configurations more effectively. For more information, refer to the [Enabling DQLabs](#) section.

erwin DI supports DQ 3.x.

## What's New

The screenshot shows a user interface for managing connection details. At the top, there are three toggle buttons: 'Enable Native Profile' (disabled), 'Enable DQ Fields' (disabled), and 'Enable DQLabs' (enabled). Below these are four action buttons: 'History' (blue), 'Test' (green), 'Save' (blue), and 'Cancel' (orange). The main section is titled 'Connection Details' and contains five input fields: 'DQ Version' (a dropdown menu currently showing '3.x'), 'Base URL (Private)' (a text input field), 'Public URL' (a text input field), 'Client Id' (a text input field), and 'Client Secret' (a text input field).

## Language Preference and Password Change Support

Settings to change the language preference and password are enabled for BU users. You can find these settings under My Settings profile options.

For more information, refer to the [User Interface](#) topic.
