

CA ERwin[®] Data Modeler

Release Notes

Release 9.64.01

This Documentation, which includes embedded help systems and electronically distributed materials (hereinafter referred to as the "Documentation"), is for your informational purposes only and is subject to change or withdrawal by CA at any time. This Documentation is proprietary information of CA and may not be copied, transferred, reproduced, disclosed, modified or duplicated, in whole or in part, without the prior written consent of CA.

If you are a licensed user of the software product(s) addressed in the Documentation, you may print or otherwise make available a reasonable number of copies of the Documentation for internal use by you and your employees in connection with that software, provided that all CA copyright notices and legends are affixed to each reproduced copy.

The right to print or otherwise make available copies of the Documentation is limited to the period during which the applicable license for such software remains in full force and effect. Should the license terminate for any reason, it is your responsibility to certify in writing to CA that all copies and partial copies of the Documentation have been returned to CA or destroyed.

TO THE EXTENT PERMITTED BY APPLICABLE LAW, CA PROVIDES THIS DOCUMENTATION "AS IS" WITHOUT WARRANTY OF ANY KIND, INCLUDING WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NONINFRINGEMENT. IN NO EVENT WILL CA BE LIABLE TO YOU OR ANY THIRD PARTY FOR ANY LOSS OR DAMAGE, DIRECT OR INDIRECT, FROM THE USE OF THIS DOCUMENTATION, INCLUDING WITHOUT LIMITATION, LOST PROFITS, LOST INVESTMENT, BUSINESS INTERRUPTION, GOODWILL, OR LOST DATA, EVEN IF CA IS EXPRESSLY ADVISED IN ADVANCE OF THE POSSIBILITY OF SUCH LOSS OR DAMAGE.

The use of any software product referenced in the Documentation is governed by the applicable license agreement and such license agreement is not modified in any way by the terms of this notice.

The manufacturer of this Documentation is CA.

Provided with "Restricted Rights." Use, duplication or disclosure by the United States Government is subject to the restrictions set forth in FAR Sections 12.212, 52.227-14, and 52.227-19(c)(1) - (2) and DFARS Section 252.227-7014(b)(3), as applicable, or their successors.

Contact CA Technologies

Understanding your Support

Review [support maintenance programs and offerings](#).

Registering for Support

Access the CA Support [online registration site](#) to register for product support.

Accessing Technical Support

For your convenience, CA Technologies provides easy access to "One Stop" support for all editions of [CA ERwin Data Modeler](#), and includes the following:

- Online and telephone contact information for technical assistance and customer services
- Information about user communities and forums
- Product and documentation downloads
- CA Support policies and guidelines
- Other helpful resources appropriate for your product

For information about other Home Office, Small Business, and Enterprise CA Technologies products, visit <http://ca.com/support>.

Provide Feedback

If you have comments or questions about CA Technologies product documentation, you can send a message to techpubs@ca.com.

If you would like to provide feedback about CA Technologies product documentation, complete our short [customer survey](#), which is also available on the CA Support website, found at <http://ca.com/docs>.

CA ERwin Data Modeler News and Events

Visit www.erwin.com to get up-to-date news, announcements, and events. View video demos and read up on customer success stories and articles by industry experts.

Documentation Changes

The following updates have been made since the latest release (r9.64) of this document:

- [New Features and Enhancements](#) (see page 21)—This chapter describes the new features, enhancements, and changes implemented for release r9.64.
- Operating System Support— This topic is updated to include the 64-bit support for the operating systems.
- System Requirements—This topic is updated to include the new database that is supported in release 9.64.
- [Current User Installation](#) (see page 29)—This topic is update to remove information about Windows XP.
- [Supported Target Databases](#) (see page 30)—This topic is updated to add information about Progress database.
- Issues Fixed in this Release —This topic is updated to add the list of fixed issues for this release.

The following updates have been made since the latest release (r9.6.1) of this document:

- New Features and Enhancements—This chapter describes the new features, enhancements, and changes implemented for release r9.6.1.
- Known Issues—This topic is updated to include the know issues in release r9.6.1.
- Issues Fixed in this Release—This topic provides the list of issues that are fixed in release r9.6.1.

The following updates have been made since the latest release (r9.5.2) of this document:

- New Features and Enhancements—This chapter describes the new features, enhancements, and changes implemented for release r9.6.
- System Requirements—This topic is updated to include the new database that is supported in release r9.6.
- Supported Target Server Databases—This topic is updated to include the databases that are supported in release r9.6.
- DBMS Requirements—This topic is updated to include the new database that is supported in release r9.6.
- Issues Fixed in this Release—This topic provides the list of issues that are fixed in release r9.6.

The following updates have been made since the latest release (r9.5.1) of this document:

- **New Features and Enhancements**—This chapter describes the new features, enhancements, and changes implemented for release r9.5.2.
- **Supported Target Server Databases**—This topic describes the databases that are supported in release r9.5.2.
- **Issues Fixed in this Release**—This topic provides the list of issues that are fixed in the current release.

The following updates have been made since the latest release (r9.5) of this document:

- **Metadata Integration Bridges Updated**—This topic describes the Metadata Integration Bridges that are updated for release r9.5.1.
- **Table of Supported Bridges**—This topic provides the complete list of Metadata Integration Bridges that are supported in the current release.
- **Issues Fixed in this Release**—This topic provides the list of issues that are fixed in the current release.

The following updates have been made since the latest release (r9.2.0) of this document:

- **New Features and Enhancements**—This chapter describes the new features, enhancements, and changes implemented for release r9.5.0.
- **Sample Model**—This topic describes the sample model that is included with the product.
- **Operating System Support**—This topic describes the operating systems supported by the product.
- **Issues Fixed in this Release**—This topic includes the list of issues that are fixed in release r9.5.0.

The following documentation updates have been made since the last release (r9.0) of this documentation:

- **New Features and Enhancements**—This chapter describes the new features, enhancements, and changes implemented for r9.2.0.
- **New Features and Enhancements**—This chapter describes the new features, enhancements, and changes implemented for r9.1.
- **Fixed Issues**—This chapter describes the issues that are fixed for r9.1.
- **Documentation Formats and Deliverables**—Updated to include the addition of role based guides in a new section in the bookshelf.

The following documentation updates have been made since the last release (r8.2) of this documentation:

- **New Features and Enhancements**—This chapter describes the new features, enhancements, and changes implemented for r9.
- **Operating System Support**—Added version clarifier.

- System Requirements—Added the requirements for Mart server and web server.
- Documentation Formats and Deliverables—Updated to include the addition of role based guides in a new section in the bookshelf.

Contents

Chapter 1: CA ERwin Data Modeler Editions 11

Community Edition.....	11
Standard Edition.....	14
Workgroup Edition.....	15
Navigator Edition.....	16
CA ERwin Data Modeler for Microsoft SQL Azure.....	16
Sample Model	18

Chapter 2: New Features and Enhancements 21

Support for 64-bit Architecture.....	21
Internationalization (i18n)	22
Metadata Integration Bridges Updated	22
Microsoft SQL Server Support	22
Enhanced Script Client API	22
PostgreSQL Support for Mart Server.....	23
Table Filter Option for REC.....	23
API Access Only License.....	23
Alternate Catalog for DB2 LUW.....	24

Chapter 3: System Information 25

Release Numbering Scheme in CA ERwin Data Modeler	26
Operating System Support	27
System Requirements	27
Administrative Privileges Required	29
Current User Installation	29
Supported Target Databases.....	30
CA ERwin Data Modeler Workgroup Edition Requirements	30
Administrator Server System Requirements.....	30
DBMS Requirements	31
Client Workstation Requirements.....	32
CA ERwin Data Modeler Navigator Edition Requirements.....	32
Support for CA ERwin Data Modeler Navigator Edition.....	32

Chapter 4: Installation Considerations for CA ERwin Data Modeler Workgroup Edition	33
CA ERwin Data Modeler and Mart Release Numbers	33
Microsoft SQL Server 2005 Permissions.....	33
Specify Use of Foreign Characters With Microsoft SQL Server 2005	34
 Chapter 5: Installation Considerations for CA ERwin Data Modeler Navigator Edition	 35
Silent Install	35
 Chapter 6: General Considerations for Using CA ERwin Data Modeler Workgroup Edition	 37
Model Conversion and Complete Compare Differences	37
Model Display in the Difference Reconciliation Dialog	37
Model Display in the Difference Reconciliation Dialog	38
Help Files	38
Uninstalling CA ERwin Data Modeler Workgroup Edition.....	38
 Chapter 7: General Considerations for Using CA ERwin Data Modeler Navigator Edition	 39
 Chapter 8: Known Issues	 41
SQL 1105 Error	42
API Functions not Working for Sybase Mart	42
CA ERwin Data Modeler and Crystal Reports Shell Installation	42
Model and Version Name Limit on Oracle	43
.Net Requirement.....	43
Mart Reports Work with Crystal Reports Developer Edition	43
Statistics not Reverse Engineered from Teradata	43
Report on Glossary Words Includes Extra Characters.....	43
Updating Profile Description from Notepad	43
Unwanted Result Rows in Report	44
DSM Logical to SQL Server 2012	44
Report Designer Functions for a Large Model	44
Subject Area Picture Report not Generated	44
Incorrect UDP in UDP Report	45
Invalid Column Node for DB2 LUW Model in View Report	45
Mart Server Name in Korean.....	45
Generating Reports with Korean Characters in User Name.....	45

Error While Creating a Profile Using Special Characters in Mart Administrator	46
Log Files not Created if Mart Server Run as Windows Service	46
Rollup Sub Tables Option Not Working for PDF	46
Physical Names Not Calculated in Mart Model Reports	47
Index Created for Columns Header Containing Name	47
Report Result Total Row Count Mismatch	47
Mart Reports Fail with Crystal Reports Developer Edition for the 64-bit Application	47
Hot Keys Work Incorrectly in a Localized Keyboard	47
Sybase Connectivity Error	48
Reverse Engineer a Script that Contains Localized Characters	48
Alter Script does not work for Sybase	48
Table and AK Index Name Change	48
Garbage Characters in the Imported Model	48
ERwin9 Spy Addin component is missing from the Select Component for Addin List	48
Error While Importing and Exporting a MITI in a Korean Operating System-	49
Application Configures for Nonadministrative Tasks	49
Command Prompts Appear During Installation	49
Model Icons Appear Differently	49

Chapter 9: Fixed Issues **51**

Issues Fixed in this Release	52

Documentation Formats and Deliverables	53
Technical Documentation Series	55
Release Numbers	55

Appendix A: Appendix **57**

Appendix B: Third Party Software Acknowledgment **59**

Chapter 1: CA ERwin Data Modeler Editions

The following editions of CA ERwin Data Modeler are available:

[Community Edition](#) (see page 11)

[Standard Edition](#) (see page 14)

[Workgroup Edition](#) (see page 15)

[Navigator Edition](#) (see page 16)

[CA ERwin Data Modeler for Microsoft SQL Azure](#) (see page 16)

This *Release Notes* details new features, enhancements, updates, and known issues for all editions of CA ERwin Data Modeler.

Note: Depending on the edition of CA ERwin Data Modeler you are using, not all features may be enabled for use. For more information about the differences between versions, click one of the Edition links.

Community Edition

The Community Edition includes a limited number of features from the main product. It is designed to help data modelers learn data modeling techniques, create simple data models, and learn about the design and maintenance of a production database.

Most of the basic features are available, with limited access to the following features:

25 Entities/Tables Per Model

You can reverse-engineer, import using Metadata Integration (MITI) bridges, or create up to 25 entities/tables per model. There is no restriction on the number of views you can create.

If you attempt to reverse engineer a script or a database with more than 25 tables, or attempt to open a model with more than 25 tables, a warning message displays. For Oracle and SQL Server, the reverse engineer process stops after creating 25 tables in the new model. For other databases, a warning message displays, stating that the import feature is disabled.

Note: Some operations that include the creation of temporary tables may also result in exceeding the allowed table limit. For example, if you reverse engineer a DB2/LUW script that contains 25 tables and a materialized view, the temporary table used to create the materialized view will cause you to exceed the allowed table limit for the model.

Read-Only Complete Compare

You can use Complete Compare features to evaluate and compare models, but you cannot commit changes you make in the Complete Compare wizard to the models you compare. The "Finish" button is disabled in the Resolve Differences dialog. In addition, demand loading of databases and Alter Script generation are not supported.

Note: If you are working with a database as part of the compare process, only the first 25 tables are reverse engineered to the model used during the compare. This may result in problems in the Complete Compare Resolve Differences dialog, where objects and properties between the models will not match. To avoid problems, work with a database that has fewer than 25 tables.

Reports

You can use the new reporting tool, Report Designer to generate and view reports. You can export reports to HTML, but not to TEXT and PDF. In addition, you cannot copy data that is displayed on the result grid.

Save As

You can save your models in the native *.erwin format or as a template (*.erwin_tmpl). Save As XML, ER1, and ERT is not supported.

File Open

You can open a model in *.erwin or *.erwin_tmpl format, and a SQL DDL file in the format *.sql, *.ers, or *.ddl.

Print a Model

Support for printing models is included in the Community Edition, although the output includes a watermark.

Working with Transformations in the Community Edition

You can work with transformations to implement design decisions, such as partitioning tables. However, because of the limitation to 25 entities/tables per model, some transformation operations may not be possible. For example, if you are near the limit of 25 tables and choose to partition a table, you may surpass the table limit, and the transformation operation will not complete.

The Advisories Pane on the main workplace window reports a message reminding you that the intended action did not complete because of the object creation limit.

Limited Database Support

Support is included for modeling using the following databases:

- Oracle (10.x/11g/12c)
- SQL Server (2008/2012/2014)
- DB2 LUW (9.5, 9.7, 10.x)

- MySQL (5.x, using ODBC)
- ODBC (2.0, 3.0)
- Sybase (15.x/16)

Limited Access to Metadata Integration (MITI) Bridges

Support is limited to the following Metadata Integration (MITI) Bridges for import. Export using Metadata Integration (MITI) Bridges is not supported.

- Sybase PowerDesigner OOM 9.x to 15.x (using UML XMI)
- Sybase PowerDesigner CDM 6.x
- Sybase PowerDesigner CDM 7.5 to 15.x
- Sybase PowerDesigner PDM 6.1.x
- Sybase PowerDesigner 7.5 to 15.x
- Embarcadero ER/Studio
- Embarcadero ER/Studio (using DM1)
- OMG/CWM 1.x XMI 1.x
- OMG/UML 1.x XMI 1.x

Note: If the file you import has more than 25 tables, the Community Edition imports only the first 25 tables.

Other limitations of the Community Edition include the following:

- A copy of Crystal Reports 2008 is not included with the Community Edition.
- Features supporting the creation and implementation of data type standards are not enabled.
- Access to the CA ERwin Data Modeler Workgroup Edition is disabled. When working with Complete Compare, the option to compare your model with a model in a Mart is disabled.
- The Community Edition license is valid for one year. After one year you can reinstall the Community Edition with a new license, or purchase and install a full version of the product. You can install and use the Community Edition without entering a license key for 30 days from the date you installed the product.

Documentation

The Community Edition includes online help files and PDF guides available on the ERwin Bookshelf, which is accessible from the Start menu.

To view PDF files, you must download and install the Adobe Reader from the Adobe website if it is not already installed on your computer.

Standard Edition

CA ERwin Data Modeler Standard Edition provides all the data modeling features used by Data Architects, Data Administrators, and Application Administrators, but does not include any workgroup modeling capabilities. You can use this edition as a standalone modeling tool, and as a Workgroup Edition client that can access and work with data models stored in a mart. When you enable data movement or dimensional modeling features, it provides a tool for assisting Data Administrators and Capacity Managers design data warehouses. Partners can use the API to create add-on solutions to CA ERwin Data Modeler. With the optional SQL Azure extension, you can take advantage of using SQL Azure as a target database.

Workgroup Edition

CA ERwin Data Modeler Workgroup Edition provides all the data modeling features used by Data Architects and also includes workgroup modeling capabilities used by Database Administrators, Application Administrators, and Application Owners. It provides conflict resolution, versioning, security and standardization for multi-user modeling. Workgroup modeling operates in a client/server environment so processing is shared between the user client workstation and the server where the models are stored. Users access the stored models through a client, such as CA ERwin Data Modeler. Models are held in a platform and network independent database or mart that resides on a central server, using Microsoft SQL Server, Oracle, or Sybase as the host database. With the optional SQL Azure extension, you can take advantage of using SQL Azure as a target database.

The key features of CA ERwin Data Modeler Workgroup Edition include:

Web-based administrator (CA ERwin Mart Administrator)

Helps the administrator administer the Mart. The administrator creates the Mart database, installs and configures CA ERwin Mart Administrator before users can connect to the Mart. CA ERwin Mart Administrator is hosted on a web server and is accessed through an Internet browser.

Model change impact analysis

Provides a change summary showing the impact of changes and the history of the affected model objects, allowing you to select which changes to apply to the model repository.

Version management

Lets Data Architects store, access and analyze the history of a model and the changes made to it, lock down specific versions, run difference reports between versions, and seamlessly roll back models to previous states as required.

Concurrent model access with optional model locking

Allows multiple users to concurrently work on a given model without compromising the integration and integrity of their parallel efforts.

The administrator installs the program and initializes the database on the DBMS server. The administrator also has the responsibility of setting up the library structure in which models are organized, and assigning security profiles to users. Administration overhead is relatively low and proportional to the number and activity level of the users. After a model is saved to the database, control of who can work on the model and how changes are saved to the model is handled by security, making it possible for workgroups to work on large models without confusion. CA ERwin Data Modeler Workgroup Edition supports many security and administrative features related to its multiuser capabilities and the client/server environment in which it operates. For this reason, routine management is usually performed by a dedicated administrator. Administrators can find detailed information regarding their tasks and responsibilities in the CA ERwin Data Modeler Workgroup Edition *Administration Guide*.

You can also use CA ERwin Data Modeler Navigator Edition as a client. Read-only access is permitted to data models, so your workgroup can use this client to share information with others without the risk that unauthorized changes might be saved to the mart.

Navigator Edition

CA ERwin Data Modeler Navigator Edition provides a cost-effective way to provide read-only access to models built with CA ERwin Data Modeler for viewing and analysis. This edition does not permit you to make any changes to models.

The key features of CA ERwin Data Modeler Navigator Edition include:

Read-only access

Read-only access is provided to models created by CA ERwin Data Modeler and it can also be used as a Workgroup Edition client for viewing a data model stored in a mart. Use the Navigator Edition to easily share model information without the risk of unauthorized changes to a model.

Navigation and Viewing

Provides those who need to view models, but not update them, full navigation and viewing of data models.

Reporting and Publication

Offers reporting and printing capabilities that generate in a variety of formats, including HTML and PDF.

CA ERwin Data Modeler for Microsoft SQL Azure

If you plan to use SQL Azure as your target server with CA ERwin Data Modeler, verify that your SQL Azure license is present either on the computer on which you plan to run CA ERwin Data Modeler, or on the License Server. This means, if you are using a local CA ERwin DM license, then you must have the license for SQL Azure locally. If you are using a License Server to get the CA ERwin DM license, then you must have the license for SQL Azure on the License Server. If you do not have a SQL Azure license, you cannot select SQL Azure as a target server. This requirement is effective for all editions of CA ERwin Data Modeler, including Community Edition.

The following tables compare the differences in CA ERwin Data Modeler functionality depending on whether you are using the SQL Azure extension:

Community Edition with SQL Azure Extension
Limited database support, however SQL Azure is available as a target server for new models and deriving models
SQL Azure models can be opened directly

Community Edition with SQL Azure Extension
Opening a file in XML format is supported
Alter Script in Forward Engineering is enabled only for SQL Azure models
No entity/table volume limitation for SQL Azure models only
Notes: <ul style="list-style-type: none"> You can reverse engineer from any of the supported target server databases, but when the reverse engineer process finishes, switch to one of the available CE target server databases (DB2 for LUW, MySQL, ODBC/Generic, Oracle, SQL Azure, SQL Server, or Sybase). If you attempt to reverse engineer more than 25 entities/tables, verify that your target server is SQL Azure. If it is not, then only the first 25 entities/tables are converted and the rest are removed.
On-demand loading and model saving during Complete Compare is enabled only for SQL Azure models
Printing a SQL Azure model is supported and the output does not contain a watermark
Data type standards are supported
Only SQL Azure models can be saved in any of the available formats
Access to marts (workgroup modeling) is not supported
Full use of all available MITI import and export bridges
Crystal Reports is supported

Standard Edition	Standard Edition with SQL Azure Extension
SQL Azure is not available as a target server for new models and deriving models	SQL Azure is available as a target server for new models and deriving models
Opening a SQL Azure model launches a dialog prompting you to select a different target server	SQL Azure models can be opened directly
SQL Azure is not an option in the CA ERwin Data Modeler Target Server dialog	SQL Azure is available for selection in the CA ERwin Data Modeler Target Server dialog

Workgroup Edition	Workgroup Edition with SQL Azure Extension
SQL Azure is not available as a target server for new models and deriving models	SQL Azure is available as a target server for new models and deriving models
Opening a SQL Azure model launches a dialog prompting you to select a different target server	SQL Azure models can be opened directly
SQL Azure is not an option in the CA ERwin Data Modeler Target Server dialog	SQL Azure is available for selection in the CA ERwin Data Modeler Target Server dialog
Mart access is disabled for SQL Azure models	Mart access is enabled for SQL Azure models

Sample Model

When you install CA ERwin Data Modeler, a sample model by name eMovies is installed. Use this model as an example to learn data modeling and to learn how to use the tool.

This model is available in the following folder:

<install folder>\ERwin Data Modeler r9\BackupFiles\Samples\Standard

Note: If you access the sample model from the install folder, you must run the data modeling tool as an administrator to open the eMovies model.

The business requirements of this model are as follows:

- Manage employee details
- Manage store details
- Manage movie details
- Manage copies of movies
- Manage customer details
- Maintain movie rental details for customers
- Record payment details for rented movies
- Display the credit status of customers
- Generate invoices for customers
- Display overdue details for customers
- Search for customers
- Search for movies that are rented based on the rented date, customer phone number, employee number, or movie number

Apart from entities, attributes, and relationships, this model serves as an example for the following features:

- Domains
- Logical Model
- Subject Area
- Annotation
- Key Groups

- ER Diagrams
- Naming Standards Object
- Data Type Standards Object
- Themes
- Validation Rules

Chapter 2: New Features and Enhancements

This section contains the following topics:

[Support for 64-bit Architecture](#) (see page 21)
[Internationalization \(i18n\)](#) (see page 22)
[Metadata Integration Bridges Updated](#) (see page 22)
[Microsoft SQL Server Support](#) (see page 22)
[Enhanced Script Client API](#) (see page 22)
[PostgreSQL Support for Mart Server](#) (see page 23)
[Table Filter Option for REC](#) (see page 23)
[API Access Only License](#) (see page 23)
[Alternate Catalog for DB2 LUW](#) (see page 24)

Support for 64-bit Architecture

From Release 9.64, CA ERwin Data Modeler is available as 32-bit and 64-bit versions. The CA ERwin Data Modeler 64-bit version provides improved performance when compared to the 32-bit version.

You can install either a 32-bit or 64-bit version of CA ERwin Data Modeler Release 9.64 on your computer depending on your operating system and hardware requirements. You can also upgrade from an existing Release 9.x 32-bit version to the 64-bit version.

Note: You cannot have both 32-bit and 64-bit versions of CA ERwin Data Modeler of 9.x release on the same computer. But, you can have 32-bit and 64-bit versions from different releases on the same computer. For example, you can install the Release 9.64 64-bit version and the Release 8.2.9 32-bit version of CA ERwin Data Modeler on the same computer.

Internationalization (i18n)

From Release 9.64, CA ERwin Data Modeler is internationalized and supports the following languages:

- Brazilian Portuguese
- French
- Japanese
- Korean
- Russian
- Simplified Chinese

Metadata Integration Bridges Updated

CA ERwin Data Modeler has been updated to support Meta Integration® Model Bridge (MIMB) version 9.0 from Meta Integration® Technology, Inc. You can access the bridges when you click File, Import, From External Format or File, Export, To External Format.

The following bridges are added:

- Apache Hadoop HDFS (Import)
- QlikView (Import)
- Talend Master Data Management (MDM) (Import)
- Talend Master Data Management (MDM) (Export)

The following bridges are renamed:

Old Name	New Name
Microsoft Office Excel	Metadata Excel Format (Import)
Microsoft Office Excel	Metadata Excel Format (Export)

Microsoft SQL Server Support

CA ERwin Data Modeler is now compatible with Microsoft SQL Server Release 2014 SP1.

Enhanced Script Client API

You can now forward engineer a model to generate a schema and reverse engineer a data model from a schema using the Script Client API. For more information about using the Script Client API, see the ISCPersistenceUnit section in the API Reference Guide.

PostgreSQL Support for Mart Server

You can now use PostgreSQL Release 9.4.1 to host the Mart database. For more information about how to configure a PostgreSQL Mart, see the How to Install and Configure a PostgreSQL Mart section in the Mart Server Release Notes.

Table Filter Option for REC

You can now reverse engineer a model from the database by filtering the tables using the Table Filter option. You can specify multiple search strings as comma separated values in the Table Filter text box.

Note: Table Filter option supports only SQL Server, Oracle, DB2, and Teradata databases.

API Access Only License

You can now use API access only license to access Script Client APIs with the Work Group edition features. You must install CA ERwin Data Modeler on a workstation to use the API access only licenses.

Note:

- You cannot use the CA ERwin Data Modeler UI with the API access only license. You must have a standard, work group, community or a navigation license to use the Data Modeler UI.
- The API access only license does not support concurrent licensing.

To make the Script Client APIs work with the Work Group edition features, install the API access only license.

Follow these steps:

1. Click Start, CA, ERwin, ERwin Data Modeler.
The CA ERwin DM Licensing dialog appears.
2. Click Install License File button.
3. Navigate to the license file and click Open.

The API access only license file is installed.

Alternate Catalog for DB2 LUW

The Alternate Catalog option now supports DB2 LUW.

Chapter 3: System Information

Review the following system information before installing and using the product.

This section contains the following topics:

[Release Numbering Scheme in CA ERwin Data Modeler](#) (see page 26)

[Operating System Support](#) (see page 27)

[System Requirements](#) (see page 27)

[Administrative Privileges Required](#) (see page 29)

[Current User Installation](#) (see page 29)

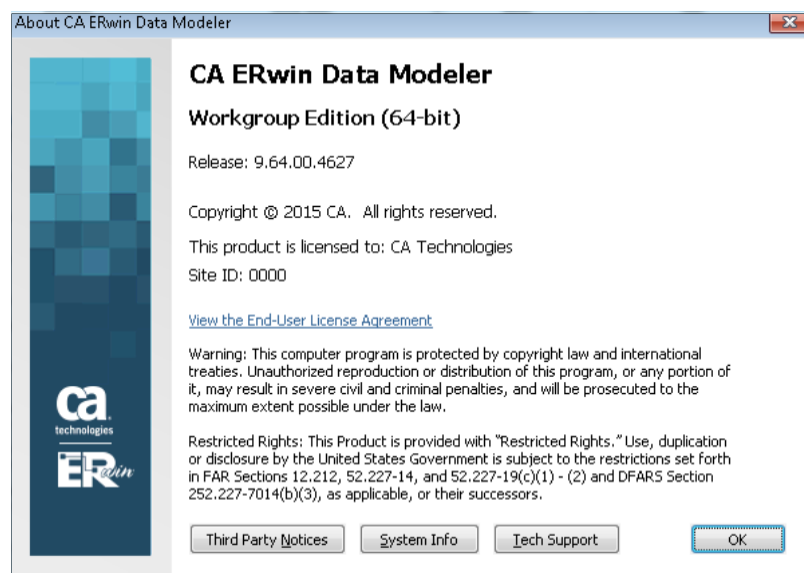

[Supported Target Databases](#) (see page 30)

[CA ERwin Data Modeler Workgroup Edition Requirements](#) (see page 30)

[CA ERwin Data Modeler Navigator Edition Requirements](#) (see page 32)

Release Numbering Scheme in CA ERwin Data Modeler

Effective with r8, the release of this product is displayed in the *About CA ERwin Data Modeler* dialog using the following release numbering scheme:

The first number always indicates the main (GA) release, the second number indicates the service pack number of the main release, the third number indicates the patch number of the main release or service pack (or both), and the fourth number indicates the build number of the product. For example, the preceding illustration indicates that the product level is r9, Build 4627. The release 9.6.1. in this dialog indicates r9 Service Pack 6, Patch Release 1, Build 4529.

If any documentation is updated after a main release, the cover page of the documentation always includes an edition number to indicate the release for which it was updated (see [Release Numbers](#) (see page 55) for more information).

Operating System Support

CA ERwin Data Modeler requires that you have the 32-bit or 64-bit version of one of the following operating systems of the latest release installed:

- Microsoft Windows Vista SP2
- Microsoft Windows Server 2008 SP2, R2
- Microsoft Windows 7 SP1
- Microsoft Windows 8.1
- Microsoft Windows 10
- Microsoft Windows Server 2012, R2

System Requirements

You can use any of the following combinations to install CA ERwin Data Modeler, the Mart database, and the MartServer application:

- Install CA ERwin Data Modeler, the Mart database, and the MartServer application on the same computer.
- Install CA ERwin Data Modeler, the Mart database, and the MartServer application on different computers.
- Install CA ERwin Data Modeler and the Mart database on one computer, and install the MartServer application on a different computer.
- Install CA ERwin Data Modeler on one computer, and install the Mart database and the MartServer application on a different computer.
- Install CA ERwin Data Modeler and the MartServer on one computer, and install the Mart database application on a different computer.

Help ensure that you always install the MartServer application on the Windows operating system.

This topic includes the system requirements for the computers on which you plan to install CA ERwin Data Modeler, the Mart database, and the MartServer application.

The following requirements must be met or exceeded for CA ERwin Data Modeler to install and run correctly:

- Microsoft-based workstation, Intel Dual Core processor or equivalent
- 5 GB available hard drive space
- 2 GB RAM minimum; more is recommended for large models
- DVD-readable device (only if installing from DVD media)

Note: The minimum screen resolution supported is 1024 x 768. If your screen resolution is less than the minimum supported, some portions of the screen will not be visible.

The following requirements must be met or exceeded for the computer on which you install the MartServer application:

Hardware requirements (based on physical hardware performance, not a virtual environment):

- 2 GHZ or higher dual core processor
- 4 GB RAM (8 GB or more for large marts)
- 4 GB of disk space or more as required to support your specific mart

Operating system requirements:

- Microsoft Windows Vista SP2
- Microsoft Windows Server 2008 SP2, R2
- Microsoft Windows 7 SP1
- Microsoft Windows 8.1
- Microsoft Windows 10
- Microsoft Windows Server 2012, R2

Database:

The Mart Server can use a “standalone” or share an existing database server:

- Microsoft SQL Server 2005, 2008, 2012, 2014, or 2014 SP1
- Oracle 10g or 11g/12c
- Sybase Adaptive Server 15.0 through 15.7 and SAP Adaptive Server Enterprise 16
- PostgreSQL release 9.4.1

The CA ERwin Mart Administrator web client meets the following requirements:

- Supported browsers:
 - Microsoft Internet Explorer 8[®] or newer
 - Mozilla Firefox[®] v.9.0 or newer
 - Google Chrome 14 or newer
 - Apple Safari 5 or newer
- Adobe Flash plug-in version 8 or newer for the respective browser

Administrative Privileges Required

Because the installation process for CA ERwin Data Modeler writes to the registry and system folders, the person installing, upgrading, or removing CA ERwin Data Modeler must have Administrative privileges. If you run an install without Administrative privileges, all files may not be installed or upgraded, and users can encounter problems when running the software.

Current User Installation

In the CA ERwin Data Modeler release 8.0, when you installed CA ERwin Data Modeler, only the user who installed the software could use it. Beginning with r8.2, the license mechanism is changed to *per machine* instead of *per user*. When you install CA ERwin Data Modeler, anyone using the computer can use it. In addition, if a valid license is available, multiple users can use CA ERwin Data Modeler simultaneously on a computer.

Because of this change, the license files are now available in the following locations:

Windows 7

C:\ProgramData\CA\ERwin Data Modeler\<release number>

Supported Target Databases

The application supports or is compatible with the following target databases:

- DB2 for i (5.x/6.x/7.x)
- DB2/LUW (9.5, 9.7/10.x)
- DB2/zOS (8.1, 9.1/10/11)
- Informix (10.x/11.x/12.x)
- MySQL (5.x)
- ODBC/Generic (2.0, 3.0)
- Oracle (10g, 11g/12c)
- Progress (9.x/10.x)
- SAS (stabilized support)
- SQL Azure (using the SQL Azure Extension)
- SQL Server (2008, 2012/2014)
- Sybase Adaptive Server Enterprise (15.x), SAP Sybase Adaptive Server Enterprise (16)
- Sybase IQ (15.x/16)
- Teradata Database (13, 13.10, 14, 14.10, 15.0)

Note: The CA ERwin Data Modeler 64-bit version is not verified for the Progress 9.x/10.x database.

CA ERwin Data Modeler Workgroup Edition Requirements

If you plan to use CA ERwin Data Modeler Workgroup Edition, review the following requirements to ensure your workgroup environment is set up properly.

Administrator Server System Requirements

The disk space required for the administrative files used to create and manage the database is separate from the disk space required to accommodate models on the server where the database is located. Greater CPU speed, and more RAM and disk space result in better performance.

DBMS Requirements

Before you install CA ERwin Data Modeler to use a MartServer in a workgroup environment, ensure that you are using a supported DBMS as your host server. This release supports the following host DBMSs:

- Oracle 10g and 11g/12c
- Microsoft SQL Server 2005, 2008, 2012, 2014, and 2014 SP1
- PostgreSQL release 9.4.1
- Sybase Adaptive Server Enterprise 15.0 through 15.7 and SAP Adaptive Server Enterprise 16

To create, update, or delete a mart in CA ERwin Data Modeler Workgroup Edition, you must have the following database rights:

- For Microsoft SQL Server 2005, 2008, 2012, 2014, and 2014 SP1 you must be the database owner (dbo).

Notes:

- The dbo is no longer required to have the sysadmin role.
- The SQL Server 2005, 2008, 2012, 2014, and 2014 SP1 TRUSTWORTHY database property is no longer required for the mart. After you install this product, you can optionally reset this property to OFF.
- For Oracle, you must be the database schema owner and have the DBA role.

Before you install Mart on the server, verify that the DBMS environment is prepared for the installation, and that the server system requirements meet at least the minimum specifications. At least one user with administrative privileges is available on the DBMS.

Note: The dbo role for Microsoft SQL Server or Sybase is necessary only during the installation or upgrade. You can strip the installer of the dbo role after the installation or upgrade is complete.

For more information about preparing the DBMS environment, see the CA ERwin Data Modeler Workgroup Edition *Implementation and Administration Guide*.

Client Workstation Requirements

You must install CA ERwin Data Modeler on each client workstation that needs to access models in the mart, and each client workstation must have access to the DBMS on which the mart is located. It is recommended that client workstations have at least 2 GB of RAM.

You can install CA ERwin Data Modeler Navigator Edition as a client for CA ERwin Data Modeler Workgroup Edition.

Note: In a workgroup environment, CA ERwin Data Modeler users can only connect to a mart initialized with the same serial number identifier that the user has licensed on their local machine.

CA ERwin Data Modeler Navigator Edition Requirements

If you plan to use CA ERwin Data Modeler Navigator Edition, review the following requirements to ensure your environment is set up properly.

Support for CA ERwin Data Modeler Navigator Edition

CA ERwin Data Modeler Navigator Edition is enabled for use with a mart-enabled version of CA ERwin Data Modeler (Workgroup Edition). Consult with your mart administrator for a GUEST user permission to access models in CA ERwin Data Modeler Workgroup Edition.

You must use a supported DBMS. This release supports the following host DBMSs:

- Oracle 10g and 11g/12c
- Microsoft SQL Server 2005, 2008, 2012, 2014, and 2014 SP1
- PostgreSQL release 9.4.1
- Sybase Adaptive Server Enterprise 15.0 through 15.7 and SAP Adaptive Server Enterprise 16

Chapter 4: Installation Considerations for CA ERwin Data Modeler Workgroup Edition

Review the following installation considerations before installing the product. For more information about the installation process for a workgroup environment, see the CA ERwin Data Modeler Workgroup Edition *Implementation Guide*.

This section contains the following topics:

[CA ERwin Data Modeler and Mart Release Numbers](#) (see page 33)

[Microsoft SQL Server 2005 Permissions](#) (see page 33)

[Specify Use of Foreign Characters With Microsoft SQL Server 2005](#) (see page 34)

CA ERwin Data Modeler and Mart Release Numbers

You must install a Mart or must upgrade to a Mart that is of the same release number as CA ERwin DM. For example, install or upgrade to an r9.5.0 Mart when you install or upgrade to CA ERwin DM r9.5.0. Using different versions of CA ERwin DM and Mart may lead to unexpected results including corruption of the Mart database or the models. Therefore, we recommend that you install the same release of the Mart and CA ERwin DM.

Microsoft SQL Server 2005 Permissions

For SQL Server 2000, you only need to have *public* assigned to save to the mart. However, when the repository is on a SQL Server 2005 instance, you need to have the *bulkadmin* permission designated as well. The ability to do bulk inserts (which was permitted by public, previously) is no longer part of the public permission. You must explicitly define this permission or when you attempt to save a model to a new mart instance created using a SQL Server 2005 database, an error "You do not have permission to use the bulk load statement." is returned.

Specify Use of Foreign Characters With Microsoft SQL Server 2005

For Microsoft SQL Server 2005, 2008, 2012, 2014, and 2014 SP1 modify your registry settings to have certain foreign language characters in your models recognized.

Follow these steps:

1. Click Run on the Start menu.
2. Enter *regedit*.

The Registry Editor opens.

3. Verify or add the following registry entry:

[HKEY_LOCAL_MACHINE\SOFTWARE\Microsoft\MSSQLServer\Client\DB-Lib]

"AutoAnsiToOem"="ON"

"UseIntlSettings"="ON"

4. Click File, Exit.

Your configuration is set to recognize foreign language characters in your models.

Chapter 5: Installation Considerations for CA ERwin Data Modeler Navigator Edition

Review the following installation considerations before installing the product. See the CA ERwin Data Modeler Navigator Edition *User Guide* for more information about the installation process.

Silent Install

This product does not provide an unattended or silent install.

Chapter 6: General Considerations for Using CA ERwin Data Modeler Workgroup Edition

The following sections contain general information you should know before using CA ERwin Data Modeler in a workgroup environment.

This section contains the following topics:

[Model Conversion and Complete Compare Differences](#) (see page 37)

[Model Display in the Difference Reconciliation Dialog](#) (see page 37)

[Help Files](#) (see page 38)

[Uninstalling CA ERwin Data Modeler Workgroup Edition](#) (see page 38)

[General Considerations for Using CA ERwin Data Modeler Navigator Edition](#) (see page 39)

Model Conversion and Complete Compare Differences

Unlike previous conversions to new releases, starting with r8, it is no longer valid to do a round-trip through another version of the product and use Complete Compare to compare the differences between the models. Due to the new changes and features in r8, the models will be different; use reports to detect and work with model differences.

Model Display in the Difference Reconciliation Dialog

In a workgroup modeling environment, two users may check out and make changes to the same model. The first user may make changes to the model and save the changes to the mart. When the second modeler makes changes and saves them to the mart, the Difference Reconciliation dialog is displayed. You use features in this dialog to view the differences on the object level, the more detailed property level, or search the text of the comparison lists.

Note: In the Difference Reconciliation dialog, the model in the left pane is the current model that you are checking in to the mart. The model in the right pane is the version of the model already in the mart.

Model Display in the Difference Reconciliation Dialog

In a workgroup modeling environment, two users may check out and make changes to the same model. The first user may make changes to the model and save the changes to the mart. When the second modeler makes changes and saves them to the mart, the Difference Reconciliation dialog is displayed. You use features in this dialog to view the differences on the object level, the more detailed property level, or search the text of the comparison lists.

Note: In the Difference Reconciliation dialog, the model in the left pane is the current model that you are checking in to the mart. The model in the right pane is the version of the model already in the mart.

Help Files

The context sensitive online help in CA ERwin Data Modeler Navigator Edition is identical to the online help in CA ERwin Data Modeler. This means that the online help may discuss capabilities such as saving a model that is not possible in the CA ERwin Data Modeler Navigator Edition product.

Uninstalling CA ERwin Data Modeler Workgroup Edition

You can use the Windows uninstall utility to uninstall CA ERwin Data Modeler. However, when you uninstall CA ERwin Data Modeler in a workgroup environment, the mart database remains intact. To remove the database from your computer, delete the mart database first, and then uninstall CA ERwin Data Modeler.

Chapter 7: General Considerations for Using CA ERwin Data Modeler Navigator Edition

The following sections contain general information you should know before using CA ERwin Data Modeler Navigator Edition.

Chapter 8: Known Issues

This section contains the known issues that you should review before using the application.

This section contains the following topics:

- [SQL 1105 Error](#) (see page 42)
- [API Functions not Working for Sybase Mart](#) (see page 42)
- [CA ERwin Data Modeler and Crystal Reports Shell Installation](#) (see page 42)
- [Model and Version Name Limit on Oracle](#) (see page 43)
- [.Net Requirement](#) (see page 43)
- [Mart Reports Work with Crystal Reports Developer Edition](#) (see page 43)
- [Statistics not Reverse Engineered from Teradata](#) (see page 43)
- [Report on Glossary Words Includes Extra Characters](#) (see page 43)
- [Updating Profile Description from Notepad](#) (see page 43)
- [Unwanted Result Rows in Report](#) (see page 44)
- [DSM Logical to SQL Server 2012](#) (see page 44)
- [Report Designer Functions for a Large Model](#) (see page 44)
- [Subject Area Picture Report not Generated](#) (see page 44)
- [Incorrect UDP in UDP Report](#) (see page 45)
- [Invalid Column Node for DB2 LUW Model in View Report](#) (see page 45)
- [Mart Server Name in Korean](#) (see page 45)
- [Generating Reports with Korean Characters in User Name](#) (see page 45)
- [Error While Creating a Profile Using Special Characters in Mart Administrator](#) (see page 46)
- [Log Files not Created if Mart Server Run as Windows Service](#) (see page 46)
- [Rollup Sub Tables Option Not Working for PDF](#) (see page 46)
- [Physical Names Not Calculated in Mart Model Reports](#) (see page 47)
- [Index Created for Columns Header Containing Name](#) (see page 47)
- [Report Result Total Row Count Mismatch](#) (see page 47)
- [Mart Reports Fail with Crystal Reports Developer Edition for the 64-bit Application](#) (see page 47)
- [Hot Keys Work Incorrectly in a Localized Keyboard](#) (see page 47)
- [Sybase Connectivity Error](#) (see page 48)
- [Reverse Engineer a Script that Contains Localized Characters](#) (see page 48)
- [Alter Script does not work for Sybase](#) (see page 48)
- [Table and AK Index Name Change](#) (see page 48)
- [Garbage Characters in the Imported Model](#) (see page 48)
- [ERwin9 Spy Addin component is missing from the Select Component for Addin List](#) (see page 48)
- [Error While Importing and Exporting a MITI in a Korean Operating System-](#) (see page 49)
- [Application Configures for Nonadministrative Tasks](#) (see page 49)
- [Command Prompts Appear During Installation](#) (see page 49)
- [Model Icons Appear Differently](#) (see page 49)

SQL 1105 Error

When you are upgrading to the current release on Microsoft SQL Server in a workgroup environment, during the mart conversion process, you may get the message "Sql 1105" if you run out of free hard disk space during the process.

Stop the conversion process, and either free or add hard disk space. Delete the already created r9 tables and then re-attempt the conversion.

API Functions not Working for Sybase Mart

When Sybase is used as the Mart database and the Mart is accessed through API, the LocateMartDirectory and LocateMartDirectoryUnit functions do not work properly.

CA ERwin Data Modeler and Crystal Reports Shell Installation

If the operating system of the machine on which you want to install CA ERwin Data Modeler version 9.0 through 9.6 and Crystal Reports is either Microsoft Windows Server 2008 or Microsoft Windows Server 2008 SP1, you may encounter the following error:

If you receive this error, the installation will not continue. You can perform one of the following to resolve this problem:

- Upgrade to Microsoft Windows Server 2008 SP2.
- Install CA ERwin Data Modeler version 9.0 through 9.6 and Crystal Reports Shell separately by downloading each application's individual installation program.
- Install CA ERwin Data Modeler version 9.0 through 9.6 and then run the Crystal Reports installation from the install wizard.

Model and Version Name Limit on Oracle

In a workgroup environment, when you save a model to an Oracle mart, the model name must be less than 130 characters. If you exceed the 130 character limit, the model will not save. Because the version name is derived from the model name (for example, <ModelName>:<version number> by <UserName> on <VersionCreateDate>), you should use model names considerably less than 130 characters in length to avoid problems with saving a model version.

.Net Requirement

The current release requires .NET 4.5.2 to be installed on your system. If you do not have it installed, the CA ERwin Data Modeler installation will attempt to install it. After you install the .NET framework, you must restart the computer to make the changes take effect.

Mart Reports Work with Crystal Reports Developer Edition

You can generate Mart reports only if you have installed Crystal Reports Developer Edition on the computer from which you want to generate the reports.

Statistics not Reverse Engineered from Teradata

Suppose a Teradata 14, 14.1, or 15.0 database includes a table with the COLLECT STATISTICS option and the database is reverse engineered. The statistics are not populated in the reverse engineered model.

Report on Glossary Words Includes Extra Characters

Suppose a report is generated on a model that includes an NSM object. If the glossary words are included in the report, extra characters appear for all glossary words.

Updating Profile Description from Notepad

In the CA ERwin Mart Administrator Profile Management page, suppose the description is copied and pasted from a Notepad file and is saved. The updated description displays syntax (\n) as well.

Unwanted Result Rows in Report

In a Subject Area report, suppose the Subject Area name is included in the report and the diagram name is specified at run time. The report lists all Subject Areas instead of the Subject Area that corresponds to the selected diagram.

DSM Logical to SQL Server 2012

Suppose a Logical/Physical SQL Server 2012 model is attached with a DSM object that is active. Suppose a new Logical Definition for the Number domain is created and mapped to SQL Server 2012 and Date is selected for domain. If the newly created Logical Definition is applied to a column in a model, and if the physical view is seen, the data type is still displayed as Number.

Report Designer Functions for a Large Model

Generating reports is a memory intensive process and when the data set is very large, the process uses the maximum memory. When the maximum memory is consumed, a warning message informs you that the application might stop responding if you continue processing the report. If you choose to continue to run the report and the memory is completely used, the program might stop responding. If you choose not to continue, the report execution is terminated.

To resolve this problem, you can generate multiple small reports with fewer properties.

Subject Area Picture Report not Generated

There is a limitation on the size of a diagram report that you can generate--the maximum size is 1900 x 1440. Suppose you create a Subject Area report for a large model using Report Designer, and export the report to HTML. If you click the diagram in the HTML report, it does not open.

To resolve this problem, reduce the zoom level of the model to reduce the picture size and then generate the report.

Incorrect UDP in UDP Report

Suppose you want to generate a report on the UDPs using Report Designer. Suppose you have already created a UDP report template and generated the report for a different model. If you close the model, open another model, and use the same template to generate the UDP report, then the report includes the UDP name from the previous model. In the result grid, the column heading shows the UDP name of the previous model, while the UDP value is of the current model. In addition, the properties of the Report Explorer also shows the UDP name of the previous model. However, the Report Properties dialog shows the correct UDP name.

Invalid Column Node for DB2 LUW Model in View Report

In a DB2 LUW model, suppose a nickname table and a view exist and a Column Option level UDP is added to a column. If a View report is generated using the Report Designer, the Column Option node is available for View. If a user selects the Column Option node, the UDP is not included in the report for the selected column.

Mart Server Name in Korean

Suppose that you provide the Mart Server machine name in the Korean language (Korean characters) and configure the Mart Server. If you try to connect to the Mart from CA ERwin DM and you provide the Korean language name for Server Name, the following message appears:

The client application version is different from the Mart Server version. Install the same version of the application and the Mart Server and then try.

If you try to log in to CA ERwin Mart Administrator by using the Korean language name, it does not display.

Generating Reports with Korean Characters in User Name

Suppose that you have initialized a Mart with a user name that has Korean characters. You connect to the Mart with this user name and generate a report on Mart users (click Tools, Mart Reports, Global Reports, Users). The report is not generated and the message, *You can not connect. Incorrect log on parameters* is displayed. (The actual message is displayed in the Korean language. The message provided here is the translated message.)

Error While Creating a Profile Using Special Characters in Mart Administrator

When you create a profile in Mart Administrator using special characters such as !@#\$%^&*()_+={}:"-<>?|/.,;\[], and space, you will get one of the following error messages repeatedly and the Mart Administrator hangs.

Illegal Group

or

500 The call failed on the server; see server log for details

or

String index out of Range:1

To avoid this error, create a profile without using the special characters. When the Mart Administrator hangs, refresh the Mart Administrator.

Log Files not Created if Mart Server Run as Windows Service

If you are running Mart Server as a Windows service, log files are not created in the corresponding user folder. To resolve this problem, modify the folder path for log files. Add the absolute path, for example, "C:/Program Files/CA/ERwin Mart Server r9/Tomcat/logs/", in the log4j.xml and logging.properties files. Ensure that the system user has Write permission for this folder.

Typically, the log4j.xml file is available in the following folder:

Tomcat\webapps\MartServer\WEB-INF

and the logging.properties file is available in the following folder:

Tomcat\conf

Rollup Sub Tables Option Not Working for PDF

Suppose for a Subject Area Picture Diagram report, the *Roll Up Subtables* option is selected and the report is exported to PDF. When an object is clicked on the Picture Diagram and the details of the object are displayed, the details are not rolled up.

Physical Names Not Calculated in Mart Model Reports

Suppose that a Mart model includes naming standards, data type standards, or macros for object names. If a report is generated on the physical names of objects using Report Designer, the report does not include the calculated (or expanded) physical names. Only the following basic macros are supported:

- %EntityName()
- %DomainName
- %AttName
- %RelName
- %KeyName

Index Created for Columns Header Containing Name

When a report is exported to PDF, indexes are generated only for those nodes that include the word 'Name' in the name of the node. For example, if you have two nodes, Schema Name and Table, only Schema Name is included in the index.

Report Result Total Row Count Mismatch

Suppose that a Mart report includes a large number of rows and the report spans multiple pages. If the report is exported to HTML, 'Total <page count>' is displayed at the end of every subsection, which gives the count of the corresponding subsection. The total count of the report is different and it is not displayed in the HTML report.

Mart Reports Fail with Crystal Reports Developer Edition for the 64-bit Application

You cannot run Mart Reports when you install CA ERwin Data Modeler 64-bit version and Crystal Reports Developer Edition on a computer.

Hot Keys Work Incorrectly in a Localized Keyboard

The Hot keys do not function properly in a localized keyboard.

Sybase Connectivity Error

An error message "Unable to locate client connectivity software LIBSYBCT64.DLL" message appears when you try to connect to Sybase IQ 12.7 database from CA ERwin Data Modeler r9.64 64-bit version .

Reverse Engineer a Script that Contains Localized Characters

When you reverse engineer a script that contains localized characters in the column names, the process fails in French and Russian operating systems. Error messages about mismatching indexes and missing relationships in the generated model appear.

Alter Script does not work for Sybase

The Alter Script feature does not work for a Sybase database when you rename a column and modify the relationship of a model.

Table and AK Index Name Change

When you reverse engineer a script or catalog using CA ERwin Data Modeler r9.64 and earlier versions, the ERwin generated table and AK index names from r9.64 are different from prior versions.

Garbage Characters in the Imported Model

When you import a .dm1 model that has object and property names in Russian into CA ERwin Data Modeler, the object and property names in the imported .erwin model appear as garbage characters.

ERwin9 Spy Addin component is missing from the Select Component for Addin List

While creating an ERwin Spy Addin using a COM object component in CA ERwin Data Modeler r9.64 in Windows Vista Operating System, the ERwin Spy Addin component is missing from the Select Component for Addin list.

Error While Importing and Exporting a MITI in a Korean Operating System-

When you import or export a MITI bridge using CA ERwin Data Modeler r9.64 32-bit version in Windows Vista English and Windows Server 2012 R2 Korean operating systems, the following error message appears.

ERwinAPI64.exe operation has stopped.

Application Configures for Nonadministrative Tasks

When you perform administrative tasks like save as XML without administrative privileges, the CA ERwin Data Modeler configuration dialog appears and configures the application for nonadministrative tasks.

Command Prompts Appear During Installation

While installing r9.64 CA ERwin Data Modeler 64-bit application a few command prompts appear briefly and disappear.

Model Icons Appear Differently

In CA ERwin Data Modeler r9.64 64-bit version, the icon of an ERwin model may look different in Windows 7 and Windows Server 2008 compared to other operating systems.

Chapter 9: Fixed Issues

This section includes the list of issues that is fixed.

This section contains the following topics:

[Issues Fixed in this Release](#) (see page 52)

Issues Fixed in this Release

The following issues are fixed in this release:

Problem No.: Issue No.:00131727: - Lithuanian users cannot save new models to mart

Sometimes when you try save a new model to the mart server, the following error message appears:

erwin.mmappserver.authorize.interceptor.ModelCreateAuthorizeInterceptor model path could not be retrieved

Problem No.: Issue No.:00078246 - Missing Relationships in some Diagrams

Relationships are missing from all subject areas in a membership diagram and cannot be added.

Problem No.: Issue No.:00204100 - Duplicate Relationships after XML Roundtrip

After an XML round trip, many duplicate relationships are created in a model.

Problem No.: Issue No.:00229651 - All models are not ready for reporting in Mart Server for reporting

In CA Erwin Data Modeler r9.6, when you try to report an error that all models are not ready for reporting in Mart Server.

Problem No.: Issue No.:00208087 - 'Show hidden objects' s.b. checked by default

In CA Erwin Data Modeler r 9.6.01, the Show Hidden Objects option is not enabled by default for Sync with Model Source. So, the sync process does not show any differences between the rolled up and hidden attributes.

Problem No.: Issue No.: 00045473 - Naming Standards - Match Whole Words Only Broken

In CA ERwin Data Modeler r9.51 and r9.6.1, because of the naming standards the logical names are modified on the physical side even when the Match Whole Words Only option is enabled.

Chapter 10: Documentation

This section contains information about current product documentation.

This section contains the following topics:

[Documentation Formats and Deliverables](#) (see page 53)

[Technical Documentation Series](#) (see page 55)

[Release Numbers](#) (see page 55)

Documentation Formats and Deliverables

The Bookshelf provided with CA ERwin Data Modeler, which is installed by default, includes documentation for CA ERwin Data Modeler Navigator Edition. You can open the Bookshelf in a web browser from the CA ERwin Data Modeler Start menu.

The documentation provided on the Bookshelf includes the following guides:

Deliverable Name	Format Provided
Add-In Manager Online Help	HTML
API Reference Guide	HTML and PDF
Data Modeling Overview Guide (This guide was earlier known as Methods Guide.)	HTML and PDF
Editing Forward Engineering Templates	HTML and PDF
Implementation Guide	HTML and PDF
Implementation and Administration Guide (Workgroup Edition) (The individual Administration and Implementation guides are merged to create one guide--Implementation and Administration Guide.)	HTML and PDF
Installation Guide	HTML and PDF
Metamodel Reference	HTML
CA ERwin Data Modeler Online Help	HTML
CA ERwin Mart Administrator Online Help	HTML
ERwin Release Notes Mart Server Release Notes	HTML and PDF

Deliverable Name	Format Provided
Template Language and Macro Reference	PDF
Upgrade Wizard Help	HTML
User Guide (Navigator Edition)	HTML and PDF

Note: For more information about the CA ERwin Data Modeler editions, see CA ERwin Data Modeler Editions.

The bookshelf includes a new section named Roles. This section includes documentation relevant to the tasks performed by each role in HTML format. The Roles section includes the following documentation:

Role	Deliverable Name
Business Analyst	Applying a theme to a model
Business Analyst	Changing the description of multiple objects
Data Architect	Applying data type standards
Data Architect	Applying naming standards
Data Architect	Creating a model
Data Architect	Generating or viewing reports
Data Architect	Compare models using Complete Compare
Data Architect	Create a Database Schema
Data Architect	How to Reverse Engineer a Database or a Script
Data Architect	How to Set Up CA ERwin Web Portal and Publish Models
System Administrator	Upgrading Mart
System Administrator	Setting up concurrent licenses
System Administrator	Using a local license
System Administrator	Using concurrent licenses
System Administrator	Adding users
System Administrator	Installing and configuring Mart

Technical Documentation Series

The Template Language and Macro Reference (*Template Lang and Macro Ref.PDF*) technical document is provided on the Bookshelf and can also be accessed from the Tech Docs menu item on the CA ERwin Data Modeler Start menu.

The CA ERwin Data Modeler metamodel reference and overview technical documents are provided on the CA ERwin Data Modeler Metamodel Reference Bookshelf. This Bookshelf is accessible from the Tech Docs menu item on the CA ERwin Data Modeler Start menu. It contains an overview of the metamodel (*ERwin Metamodel Overview.PDF*) and the metamodel object and property descriptions are provided in HTML format (*Metamodel Reference*).

To view PDF files, you must download and install the Adobe Reader from the Adobe website if it is not already installed on your computer.

Release Numbers

The release number on the title page of a document might not correspond to the current product release number; however, all documentation delivered with the product, regardless of release number on the title page, will support your use of the current product release. The release number changes only when a significant portion of a document changes to support a new or updated product release. For example, a document for r8 may still be valid for r8.1. Documentation bookshelves always reflect the current product release number.

Occasionally, we must update documentation outside of a new or updated release. To indicate a minor change to the documentation that does not invalidate it for any releases that it supports, we update the edition number on the cover page. First editions do not have an edition number.

Appendix A: Appendix

This section contains the following topics:

[Third Party Software Acknowledgment](#) (see page 59)

Appendix B: Third Party Software Acknowledgment

The following license agreements are available in the \Bookshelf Files\TPSA folder in the CA Bookshelf:

- Tomcat 7.0.64
- Oracle 11G JDBC driver 11.1.0.6
- Oracle (Sun) JRE 1.8.0_51

JRE

This Product is distributed with JRE from Oracle America, Inc. Oracle owns the Java trademark and all Java-related trademarks, logos and icons including the Coffee Cup (the “Java Marks”). Any source code provided is solely for reference purposes. Use of the Commercial Features of the JRE for any commercial or production purpose requires a separate license from Oracle. 'Commercial Features' means those features identified Table 1-1 (Commercial Features In Java SE Product Editions) of the Software documentation accessible at <http://www.oracle.com/technetwork/java/javase/documentation/index.html>. Oracle has provided additional copyright notices and information that may be applicable to portions of the JRE in the THIRDPARTYLICENSEREADME.txt file that accompanies the JRE files.
